# Location URL Parts

PROGRAMMING HERO

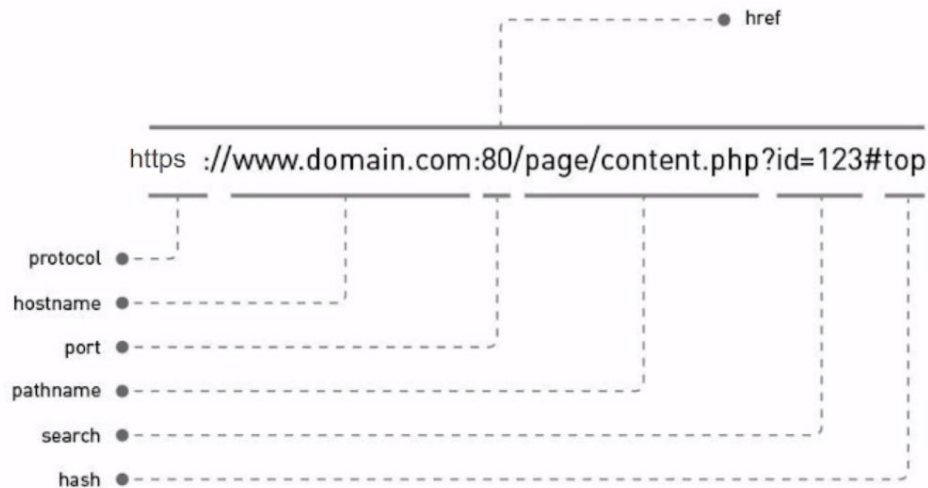

Programming Hero

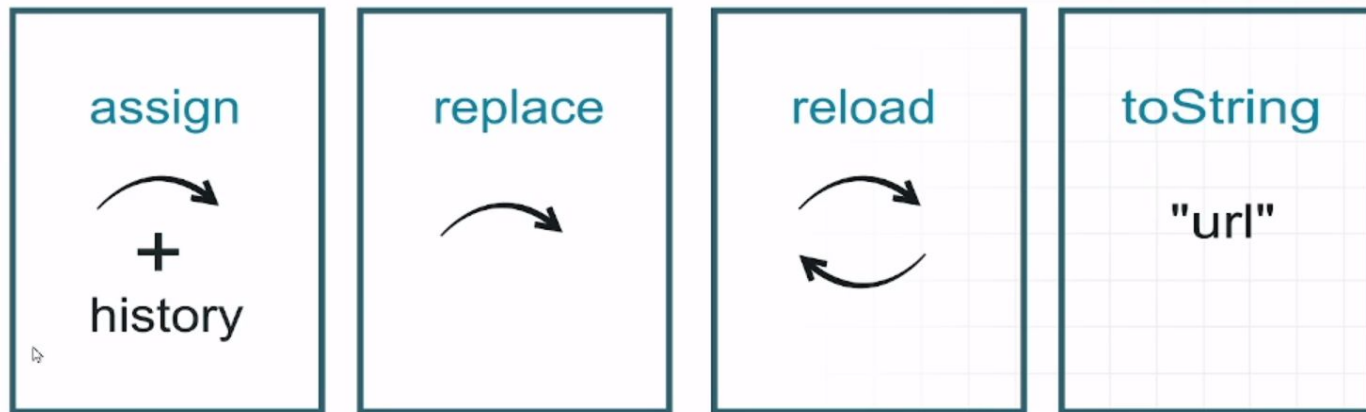

## Location (URL Parsing) - Properties

## Location (URL Parsing) - Methods

---

Programming Hero

## Location – Redirect to another webpage

**location.assign()**

Keep the history and add to that

**location.replace()**

Replace the current history

**location.href**

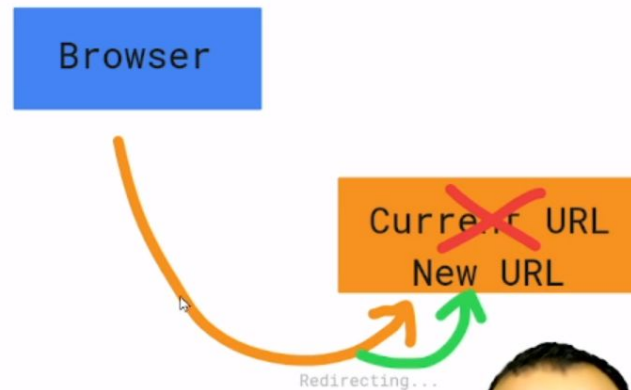

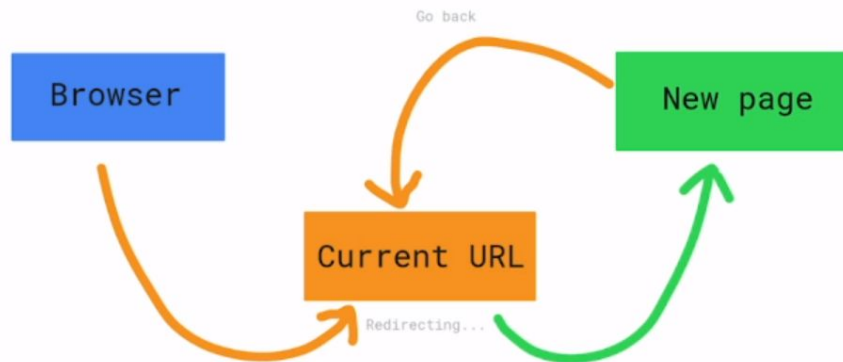

Another way to redirect, keep the history

Programming Hero

## Location – assign() vs replace()

Programmer zero

## Location – replace() vs href

---

```
//it's similar to http redirect  
window.location.replace("https://www.example.com");  
  
//it's similar to clicking on a link  
window.location.href = "https://www.example.com";
```
